

Peter Price

Address: 179 Rock Street, Sheffield, S3 9JF, UK
Mobile: +44 7927578546

Email: petedprice@gmail.com
Date of Birth: 5th October 1994

Postdoctoral researcher at the University of Sheffield Wright Lab researching the causes & consequences of sexual dimorphisms across the tree of life. PhD in evolutionary genomics from University of Sheffield. First Class MSci from University College London in Human genetics.

Publications

Price et al., (2026) Molecular evolution of a sex-linked inversion polymorphism in zebra finches. *Genome Biol. Evol.* doi.org/10.1093/gbe/evag056

Price et al, (2025) Single-cell consequences of X-linked meiotic drive in stalk-eyed flies. *PLoS Genet.* doi.org/10.1371/journal.pgen.1011816

McCabe, Price, et al., (2024) Long-read sequencing for fast and robust identification of correct genome-edited alleles: PCR-based & Cas9 capture methods. *PLoS Genet.* doi.org/10.1371/journal.pgen.1011187

Price et al., (2023) Recent progress in understanding the genomic architecture of sexual conflict. *Curr Opin Genet Dev.* doi.org/10.1016/j.gde.2023.102047

Smith et al., (2022) Fourth Report on Chicken Genes and Chromosomes. *Cytogenet Genome.* doi.org/10.1159/000529376

Price et al., (2022) Reply to: Existing methods are effective at measuring natural selection on gene expression. *Nat Ecol Evol.* doi.org/10.1038/s41559-022-01916-7

Price et al., (2022) Detecting signatures of selection on gene expression. *Nat Ecol Evol.* doi.org/10.1038/s41559-022-01761-8

Education & Employment

2022-Present: Postdoctoral researcher: Wright Lab, University of Sheffield. Supervisor: Dr Alison Wright.

2020-2024: PhD awarded with no corrections: Wright Lab, University of Sheffield. PhD title: *Conflict & competition in the evolution of sexual traits*. Supervisor: Dr Alison Wright. Co-supervisor: Professor Jon Slate

2019-2020: Research Assistant, MRC Harwell, UK. *Molecular validation of CRISPR edits with Nanopore sequencing*. Supervisor: Dr Lydia Teboul

2014-2018: MSci in human genetics at University College London. Awarded First Class. Dissertation: *Population genetic computational methods to infer positive selection*. Supervisor: Professor Garrett Hellenthal.

Academic Events

Presented talks: EMPSEB 2022, ESEB 2022, 2025, PopGroup 2024, 2026, EMBO selfish elements 2026.

Training: Physalia - Network Analysis in R. NEOF - Unlock the Power of eDNA with DADA2.

Skills & experience

Molecular ecology: Low-input DNA & RNA extraction, QC, & quantification. Cell preparation for scRNA-seq.

Programming: R, bash, Nextflow, Python, HPC. Variant calling, bulk & scRNA-seq quantification, population genetics, GRN analysis in SCENIC, PAML, DADA2.

Grants: AGA EECG Research Award 2022 (\$5,995). Genetics Society ESEB travel grant 2022 (£750)

Teaching: MSc supervision (TuoS). Masters level RNAseq & HPC & Level 2 Human Genetics (TUoS). Nanopore analysis of CRISPR editing (MRC)

Reviews: PLOS Computational Biology, GENE, MBE & Heredity

Fieldwork: Collection & processing of *T. dalmanni* samples in Peninsula Malaysia in collaboration with Pomiankowski lab at UCL

Other: PhD representative. Full UK driving license with panel van & off-road experience

Referees

Dr Alison Wright - PhD Supervisor, University of Sheffield, a.e.wright@sheffield.ac.uk

Professor Jon Slate - PhD Co-supervisor, University of Sheffield, j.slate@sheffield.ac.uk
